

MODEL DUPLICATOR

Core Values Activity

By Sanjay and Arvind Seshan

Objectives:

- Learn to communicate clearly
- Give good instructions
- Listen to teammates

Before you begin:

2 sets of the identical pieces of LEGO (5-6 pieces each such as the "homework" mission model pieces from World Class) or even a real LEGO mini-build from a polybag (such as the LEGO duck pictured above)

Minimum of 2 kids

Optional: Cardboard box/poster board to be used as a separator to block view (kids can also sit back-to-back instead).

Notes for the Coach/Team Mentor:

This activity is taken from the World Class season Challenge Document where teams were given extra sets of the homework mission model and asked to "duplicate it" as a Core Value activity.)

This activity can be done in pairs or you can also split the team in two and do the same activity as one larger group instead. We have done this activity both ways.

If you do it in pairs, the activity tests how well each pair communicates. If you do it as a group, you will see how well building and duplicating works with more people involved.

Print out these instructions for your team:

Split up in pairs. One student is the Builder of the model and the other is the duplicator. The Builder will give instructions to the Duplicator who cannot see the model (sit back to back or behind a cardboard blocker).
