

# VOLCANIC PANIC

## Core Values Activity

By Droids Robotics

### Materials:

5 placemats/cloths/pieces of paper that would at most hold 2 people at a time.

### Instructions:

The volcano just erupted. You have 5 special tiles to place on the flowing lava stream. You are safe on these tiles. Use them to get your team across the room. You may not use anything else. You may not step into the lava. If anyone on the teams steps in lava, you have to start all over again.

### Variations:

Add some extra items such as buckets or food that must also be transported. Have one

person be blindfolded and the others have to guide them too.

### Discussion:

How did the team make best use of the 5 tiles/placemats? Was there one leader in the group? Did they plan out their strategy before they started?
