

# TALL TOWER

## Core Values Activity

By [www.flstartingpoint.com](http://www.flstartingpoint.com); [hello@startingpoints.com](mailto:hello@startingpoints.com)

### Materials

**40 magazine subscription cards**  
**10 marshmallows**  
**20 toothpicks**  
**Yardstick or measuring tape (for measuring purposes only, not for construction)**

### Instructions to the team:

**You have 5 minutes to use these construction materials to build a tower as tall as possible. After the 5 minutes are up, we will measure the height of the tower.**

### Discussion:

**How many members of the team can do hands-on work on the tower at any one time? Does it make sense to have the same people serve as builders for the entire time, or is it better to switch out? What roles can other team members play if they are not serving as builders?**
