Notecards can help you be more efficient during the robot game. If you have multiple robot operators, they help everyone to learn all the runs. You can create these for any Challenge year. Tournaments usually allow teams to take notecards up to the game table, but please check with your organizers.

Instructions: Print and cut out these notecards to help your team operators remember your runs, attachments, starting positions, etc. Draw in your robot in base. Staple them in the correct order.

Run Name and Number:

Missions Accomplished:

Starting Alignment:
